To whom it may concern,

It is my great pleasure to recommend Mr. Ouail El Maadi, whom I have had the privilege to supervise both during his internship and currently in his capstone project at Al Akhawayn University in Ifrane. I have also taught Ouail in my Agile Software Engineering and DevOps course during Fall 2024, where he distinguished himself through his strong technical understanding, teamwork, and ability to apply modern software engineering practices effectively.

During his internship under my supervision, Ouail consistently demonstrated remarkable professionalism, initiative, and problem-solving abilities. He was proactive in identifying challenges and creative in proposing solutions, often going beyond assigned tasks to improve efficiency and quality. His communication and collaboration skills allowed him to work effectively with both peers and supervisors, making him a dependable and results-oriented intern.

As his current capstone supervisor, I continue to be impressed by Ouail's leadership, technical expertise, and research-driven mindset. He approaches each stage of the project with maturity and precision, ensuring that all objectives are met with excellence. His optimism, discipline, and dedication to learning make him an exemplary student and a pleasure to mentor.

Beyond his academic performance, Ouail stands out for his positive attitude, curiosity, and intellectual depth. He embraces challenges as opportunities to grow and continually seeks to expand his knowledge in fields such as High-Performance Computing, Artificial Intelligence, and Software Engineering. I am confident that his motivation and research potential will make him a valuable addition to any graduate program.

I strongly and without reservation recommend **Mr. Ouail El Maadi** for admission to your **Master of Science in Computer Science program**. His technical skills, strong work ethic, and genuine passion for research will allow him to thrive and contribute significantly to your academic community.

Please feel free to contact me if you require any additional information.

Sincerely,

Best regards,
Dr. Houda Chakiri
Assistant Professor of Computer Science
Lead Master of Sience in Big Data Analytics (MSBDA)
School of Science and Engineering
Al Akhawayn University, Ifrane, Morocco
